Hi,

I used to get this kind of cups-related error-message, where I have no idea, what the "Unknown Location directive #" would mean:

```
khazad-dum:/var/log/cups # tail error_log
I [29/Mar/2005:08:58:05 +0100] Listening to 0:631
E [29/Mar/2005:08:58:05 +0100] Unknown Location directive # on line 811.
I [29/Mar/2005:08:58:05 +0100] Loaded configuration file "/etc/cups/cupsd.conf"
I [29/Mar/2005:08:58:05 +0100] Configured for up to 100 clients.
I [29/Mar/2005:08:58:05 +0100] Allowing up to 100 client connections per host.
I [29/Mar/2005:08:58:05 +0100] Full reload is required.
I [29/Mar/2005:08:58:09 +0100] LoadPPDs: Read "/etc/cups/ppds.dat", 3592 PPDs...
I [29/Mar/2005:08:58:12 +0100] LoadPPDs: No new or changed PPDs...
I [29/Mar/2005:08:58:12 +0100] Full reload complete.
khazad-dum:/var/log/cups #
```

Any advice please, what I'm missing, or what is wrong? I have all the recently released YOU updates installed, so "cups-1.1.20-108.22" ...

Thanks,
Pelibali
