Following on from my earlier post on the problems with wireless usb adapter, SuSE 9.3 does not recognise the DVD writer attached to the PC. On boot, there are IDE seek errors. If however, SuSE 9.2 is booted no errors are reported. In 9.3, XMMS crashes if a cd displayed, while in 9.2. there are no problems.

The more I use 9.3 the more I am disappointed with this release.

Sudhir
