Hello,

I've upgraded from SuSE 9.0 to SuSE 9.3. I had a problem with some usb devices working on 9.0 but NO on 9.3. I happily found the reason and the fix is trivial:

See whether you have in /etc/fstab the line

```
usbdevfs      /proc/bus/usb  usbdevfs noauto      0 0
```

you have to change to

```
usbfs         /proc/bus/usb  usbfs noauto      0 0
```

And reinit the system. After that, my Kamera Canon Ixus 400 was here again!.

Hope this will help to some desperate SuSE user, like me :).

Guillermo
