Ok, but I can't find Mozilla mail under Tools, only Thunderbird. How to import Mozilla mail ?:

Thunderbird import filter

Select your base Thunderbird mailfolder (usually

`~/thunderbird/*.default/Mail/Local Folders/`).

Note: Never choose a Folder, which does not contain mbox-files (for example a maildir). If you do it anyway, you will get many new folders.

As it is currently impossible to recreate the folder structure, it will be "contained" in the generated folder's names.
