Hey gang,

I was reading the admin book from my 9.3 Pro box and this is what I came up with. Can anyone correct anything if it's wrong please?

As root:

```
cd /usr/src/linux
```

```
make oldconfig
```

```
make menuconfig (do what I need there)
```

```
make clean bzImage
```

```
make modules
```

```
make modules_install
```

```
reboot
```

Thanks for any help with this. I tried to build the pwc modules from the 10.0.7 tarball, but kept getting errors though it worked in 9.2 IIRR.
