I've got a laptop with a 60GB drive divided 50/50 between SUSE 9.3 and WinXP. I'd like to reclaim the the 30GB WinXP partition and use the 60GB drive exclusively for SUSE (making a 30GB /data partition).

What would be the easiest way to do this? I've got Partiiion Magic 7 with which I thought I might nuke the WinXP partition. Or is doing this in Linux better. The current SUSE partitions are ReiserFS so I thought I'd do the same with this new partition.

I have a ton of data on the SUSE side and I could backup and do a complete reinstall, but this would be a last resort.

Thanks for tips.

Cheers,

Trey
