Here's something else that might be relevant. If I go into Boot Loader Configuration and do

- 1) Replace Code in MBR
- 2) Finish

I get this

Error occurred while installing GRUB

GNU GRUB version 0.94 (640K lower / 3072 K upper memory)

[Minimal BASH-like line editing supported. For the first word, TAB lists possible command completions. Anywhere else TAB lists the possible completions of a device/filename]

grub root (hd0,2)

Error 21: Selected disk does not exist

RE: [SLE] FW: Grub Problem (Was "Major Problem Moving form 9.0 to 9.1")

SuSE: RE: [SLE] FW: Grub Problem (Was "Major Problem Moving form 9.0 to 9.1")

```
grub> install -- stage2=/boot/grub/stage2 /boot/grub/stage1 d (hd0)
/boot/grub/stage2 0x8000 (hd0,2) /boot/grub/menu.lst
```

Error 12: Invalid device requested

```
grub> quit
```

Greg
