hi from siman:

i am new . i installed SUSE professional 9.3. and also i have 512 memory and 40 GB. root partition is 6.6 GB where i installed SUSE. I am not running extra server or any program ,just as normal user. But i saw all time mt memory is going to be full and suddenly system goes in black screen and started

```
stopping task.....//
```

```
freeing memory (page size).....
```

```
.....
```

```
.....
```

after some time at goes in shoutdown mode. When i push start button it started resuming task

and open previous destop and also resume the task which was running previosly. I t happens dailt 3 or 4 times? i cheacked all the things but.....

Can anybody give me a solution for that?

thanks

suman
