Hi there list,

On my SuSE 9.3 box I use Eagle (from CadSoft) for designing PCB's and schematics. At least, I'm trying. After 30 seconds or so, Eagle is not responding to my keyboardstrokes and mouse clicks. When I run the same software on Fedora, I have no trouble at all.

What could be happening here? Anyone having the same problem? Nothing is showing in the logs, so I'm a bit stuck here..

Regards,

Peter
