Hello all!

I am trying to make Klamav auto-scan my folder tree, but i get an error as i try. And if i try to load the module manually i get:

```
modprobe dazuko
```

```
FATAL: Error inserting dazuko
```

```
(/lib/modules/2.6.11.4-21.9-default/extra/dazuko.ko): Invalid argument
```

What can i do about it?

```
klamav-0.17.2-1.guru.suse93.kde34
```

```
clamav-0.87-1.1
```
