Hi!

I did an apt-get upgrade, which installed OpenOffice 2.0 and KDE 3.4.3 among other smaller updates.

The problem is that KDE is messed up, it's slowww and all the fonts are rendered as square boxes?

Should I downgrade KDE to 3.4.2? If I remember correctly, the upgrade installed something called fonts-config, maybe that's the culprit?

Any help on this would be greatly appreciated!

Kind regards,

Jan K.
