I have never seen udev rules so complicated as on SuSE. When I was testing another distro it was a fairly straight-forward syntax but I find that the rules I wrote for specific equipment do not work on SuSE 10. Guess I shouldn't have been surprised. :-\

Here's the info from 'udevinfo -e':

P: /block/sda

N: sda

S: disk/by-id/usb-CREATIVE\_Zen\_Nano\_0002F5BA1945C801

S: disk/by-path/usb-0002F5BA1945C801:0:0:0

E: ID\_VENDOR=CREATIVE

E: ID\_MODEL=Zen\_Nano

E: ID\_REVISION=0001

E: ID\_SERIAL=CREATIVE\_Zen\_Nano\_0002F5BA1945C801

E: ID\_TYPE=disk

E: ID\_BUS=usb

E: ID\_PATH=usb-0002F5BA1945C801:0:0:0

P: /block/sda/sda1

N: sda1

S: disk/by-id/usb-CREATIVE\_Zen\_Nano\_0002F5BA1945C801-part1

S: disk/by-path/usb-0002F5BA1945C801:0:0:0-part1

E: ID\_VENDOR=CREATIVE

E: ID\_MODEL=Zen\_Nano

E: ID\_REVISION=0001

E: ID\_SERIAL=CREATIVE\_Zen\_Nano\_0002F5BA1945C801

E: ID\_TYPE=disk

E: ID\_BUS=usb

E: ID\_PATH=usb-0002F5BA1945C801:0:0:0

E: ID\_FS\_USAGE=filesystem

E: ID\_FS\_TYPE=vfat

E: ID\_FS\_VERSION=FAT16

E: ID\_FS\_UUID=

E: ID\_FS\_LABEL=

E: ID\_FS\_LABEL\_SAFE=

Here's my rule:

SuSE: [SLE] SuSE's udev rules --damn!

```
SUBSYSTEM=="block", ENV{ID_PATH}=="usb-0002F5BA1945C801:0:0:0",  
SYMLINK+="zen", OWNER=="yogich", GROUP=="users"
```

Given the fact that I used the 55-cdrom.rules syntax as a guide --as well as having read the man pages-- I fully expected this rule to work post 'udevstart' but it did not. I am clueless as to why not, and would appreciate some help.

Thanks!
