I apologise because I am in effect restarting this thread. I've lost the rest of it :-(

I asked earlier about the latest edition of Linux-Magazine supposedly having the 'full' version of SuSE 10 on the cover DVD. Well, I e-mailed the magazine and got a reply from the editor himself. It turns out that they are giving a version that is not actually the 'full' retail version but is more than the Eval version.

I have a full list of exactly what is on the DVD if anybody wants me to post it up here.
