In the firewall port 20 21 tcp are open and 20 udp to....
The strange thing is it won't show here;

```
linux:~ # nmap 00.00.00.00
```

```
Starting nmap 3.81 ( http://www.insecure.org/nmap/ ) at 2005-12-09 16:42 CET  
Host ip5450f417.speed.planet.nl (00.00.00.00) seems to be a subnet broadcast  
address (returned 1 extra pings). Still scanning it due to ping response  
from its own IP.
```

```
Interesting ports on ip5450f417.speed.planet.nl (00.00.00.00):  
(The 1659 ports scanned but not shown below are in state: closed)  
PORT STATE SERVICE  
21/tcp open ftp  
22/tcp open ssh  
10082/tcp filtered amandaidx  
10083/tcp filtered amidxtape
```

```
Nmap finished: 1 IP address (1 host up) scanned in 5.385 seconds
```

Gerrit Jan Eldering

Re: [SLE] susefirewall2 and ftp

KDE-versie: 3.5.0 Level "a"
System: SuSELinux 10.0
Kernel: 2.6.13-15.7-default
