Has anybody any experience of the Epson RX620 printer/scanner?

It's pretty new so it doesn't show in the linuxprinting d/b. Suse d/b shows rx600 as problematic. Google shows some pages saying it's fine. So it would be nice to hear from somebody with personal experience :)

Oh, I'm running Suse 9.3 on an Athlon64 if it's relevant.

Thanks, Dave
