Has anyone here had success with installing openoffice 2.0.1 on SUSE 9.2? I am trying but have an unresolved dependency of: libpython2.4so.1.0.

I did a YaST search for PROVIDES and found Python provides this: libpython2.4.so.1.0

either you spelled it wrong or the developer did..

A search for a package that provides libpython2.4so.1.0 is turning up nothing. Any help would be appreciated.
