Hello SuSE people,

Running 10.0 & KDE 3.5

I can't get Amarok to play a CD. (Nor XMMS) In the playlist, I can navigate to the CD, find the .wav files, select them, and then try to load them, but they just don't load into the playlist. Probably something I am doing wrong but just don't know what it is.

I can load MP3's from my hard drive and even play streaming radio audio. Why won't this thing load and play a simple audio CD. If I put a audio CD into the drive KSCD sees it and starts to play it.

Bob S.
