Is there a way to display file names absolutely in alphabetical order in krusader or konqueror so that files and folders would not be separated in two different groups? I looked in the setups but could not find such an option.

In konqueror, in the View menu there is a submenu Sort. In there is an item "Folders first". If you uncheck that, folders will be listed in alphabetical order.

Thanks for the answers.
Unfortunately the 'sort' option is available only when the View Mode is set to Icon View or MultiColumn View.
In Detailed List View, that I use, this option is not available.

Re: [SLE] file list in konqueror or krusader file managers

Cheers,
IG

If you set the view mode to Info List View, the files and folders can be mixed as well.
