Why not go to [www.opensuse.org/Download](http://www.opensuse.org/Download) and download the real thing – all of released version of 10.1?

the original post spoke of a demo \_CD\_, installable. I know of a demo DVD and AFAIK it's not installable (if it's installable, it's a good news, but I missed that)

Yep, but a couple of weeks or so ago someone else mentioned a magazine as having a DVD so I assumed (correctly) that it was a "typo" and Keith really meant a DVD (which he did, as he later corrected himself).

Cheers.

well... I \_need\_ an installable cd and think to build one, if this was already done would be really good :-)
