I am using suse 9.3 with postfix and spamassassin, but i get a lot of spam anyway.

Does anybody know how to stop mail from .biz?

Hej Tage,

For stopping mails coming from a server with a .biz domain-name, you can use a postfix method - `check_client_access`. For mails with a From:-address of <something>.biz, you could use postfix' `header_checks`.

And I want to stop mail who have an URL for .biz

I think you'll have to write a custom spamassassin rule for that.
