Hi,

My Acrobat Reader Takes 2 minutes to load. Any idea why this happens?

Forgot to feed the hamster running your hard drive spindle?

(Just a guess.)

What is your processor/memory? I find Acrobat takes about a minute on my machine (P-IV/1.8 Centrino w/ 1GB RAM) which twice as long as Firefox, or OOo.

It may simply be that the libraries needed aren't loaded and are taking time.

Listen, strange women lyin' in ponds distributin' swords is no basis for a system of government. Supreme executive power derives from a mandate from the masses, not from some farcical aquatic ceremony.
