I mean, how in the world is M\$ going to compete with an OS that runs four times faster

I was not thrilled with Vista so far. It *really* was slower than all Windowsen and a SUSE combined. Well, slightly exaggerated, but that's how beta2 was. (Yeah, a long time has passed, but still. No SUSE Beta version was so much slower than a final.)

on existing hardware for a fraction of the money??? Do any of you see my point???

Mickey\$oft has the best marketing department bar none. No American politician not even the Kennedy family has a better damage control aka spin machine. Microsoft is better at propaganda than CBS, ABC, NBC, MSNBC, LA TIMES, NY TIMES etc combined.

At Christmas people buy the sizzle not the steak. Makes one wonder if BG

(buy?)

is a Ferengi or at least has memorized the rules of acquisition.

No, he forget this one:

#171a: Time is Latinum. The early Ferengi gets the Latinum.

Since Vista will not be out until after xmas... people gonna buy whatever is available FOR xmas.
