Hi—
I usually use 4 of them, and switch with the mouse. How can
I
switch with the keyboard? Thanks
philli@xxxxxxx (using 10.0)

Ctrl-F1/F2/F3/F4 (in KDE)

Ctrl tab works as well. It brings up a list of the windows and then
just tab to the one you want.

[Assuming KDE.]

I removed the shortcut for CTRL+TAB because it interferes with key
shortcuts I find very convenient in other applications.

I also add mappings for CTR+ALT+<arrow> that switch to adjacent virtual
desktops.

These shortcuts are controlled from the KDE Control Center. In
the "Regional & Accessibility" section the "Keyboard Shortcuts"
settings are where they're managed.
