Hi all,

How soon will there be an openSUSE 10.2 RPM for OOo 2.2? I would like to stick to the OOo that was "created by Novell, Inc. based on OpenOffice.org". The latest release I have is Build 2.0.4.7.

have you checked

[http://repos.opensuse.org/OpenOffice.org/openSUSE\\_10.2/](http://repos.opensuse.org/OpenOffice.org/openSUSE_10.2/) ?

add this repo to yast, and you will get newest version of OOo 2.2 as soon as it gets ready.
