...as I mentioned, I couldn't stand Vista. It is – IMO – worse than XP for usability.

I love this, especially the second one. After playing around with Vista, I tend to agree. On the other hand Vistas usability will probably increase when you use it for longer.

I suppose so. Still I think Win 2000 was the peak of MS operating systems. Unfortunately it has been downhill from there.

Next, I need to load Office and Visual Studio

In any case, I went ahead and installed SUSE 10.2 and had a major issue with the system locking up. Loading the binary NVidia drivers fixed that and all is well...

[http://www.perfectreign.com/stuff/2007/20070528\\_suse\\_desktop.jpg](http://www.perfectreign.com/stuff/2007/20070528_suse_desktop.jpg)

Wow! And a great wallpaper.

Re: [opensuse] Re: SUSE Laptop Now Setup with VMWare

What castle is this and where did you get it from?

Burg Hohenzollern in southern Germany.

[http://en.wikipedia.org/wiki/Burg\\_Hohenzollern](http://en.wikipedia.org/wiki/Burg_Hohenzollern)

I used to be able to see it from my dorm window when I studied there.  
It just looks cool, IMO.

...now the last thing I needed was XP to be loaded for those apps  
requiring it at work. Being a dual-core 2.x GHz processor with 2G  
RAM,  
this can handle VMWare no problem. So, I'm now done...

[http://www.perfectreign.com/stuff/2007/20070530\\_suse\\_xp.jpg](http://www.perfectreign.com/stuff/2007/20070530_suse_xp.jpg)

great!

At least you got something that makes use of all that engine  
power. ;-))

For me, it even works ok with my old 750mhz thinkpad where XP is  
running  
in a 384MB-vmware on top of a slick Xubuntu.

Wow – 750MHz – that's impressive. And I think my laptop is too slow. :P
