Hello List,

Thanks a lot for your Answers. But i press F12, it boot fine. Load the kernel ok and hang process, then show me Error message. "CD not setup" or similar error.

see you soon. Any suggestions ?

Hello List,

Live CD no boot in my notebook Dell. The CD not problem i verify it.
Any suggestions ?

Is your computer configured to boot from CD? Older computers can't.
Newer ones can be configured in the BIOS to do so.

XPS m1210 is an almost-new Dell laptop, as far as I recall. Gabriel probably needs to press the key (can't remember which) to select boot target, and select to boot from the CD/DVD drive rather than hard drive.

Regards,

Re: [opensuse] Not boot in my dell XPS m1210 #####Re: [opensuse-announce] Beta1 Live CDs

Mine uses the F12 key (Dell Inspiron 5160) and while the new ones *may* be different, I don't really know why they would change that behavior.
