Ok after 2 days of checking I found some big for me problems

1) No sound after suspend to disk

/etc/rc.d/alsasound restart or reload

don't restore the sound

mic is working I se it on krecord monitor

there is no /etc/pm/config so if someone know how to unload sound modules before suspend and load it on resume

Can somebody help me

2) some times after boot only (after resume eweryfing is ok) my keabord is not responding I need to restart computer using mous in KDM
I had it on 10.3 Live CD RC2.
