Yes, if the WGT624 was fully functional. It does not provide a functional DHCP service, broken. That *\*is\** the reason for this exercise, unfortunately.

Have you attempted to flash the firmware? A dangerous move maybe but it is possible that the firmware has been scrambled somehow. (I was under the impression that the device was toast...)

---

=====

I have always wished that my computer would be as easy to use as my telephone.

My wish has come true. I no longer know how to use my telephone.
