Trying to open a .wmv file in Kaffeine, it says no plug-in available.
Is there one, and if so, where, and what's it called?

JAY VOLLMER JVOLLMER@xxxxxxxxxx

Or take a look here: <http://opensuse-community.org/Multimedia>

You'll need the package "Win 32 codecs (w32codec-all)
If you're using SUSE 10.3, use the One Click install option.
Hope that helps
