Which KDE4 repositories should I use for upgrading KDE4? I'm running SuSE 10.3 and the current version of kde4 I have installed is 4.0.66

I know there are two repositories for KDE4 STABLE and UNSTABLE. I've tried using

http://download.opensuse.org/repositories/KDE:/KDE4:/UNSTABLE:/Desktop/openSuSE_10.3

and it's Stable equivalent (plus Extra-apps & Community)

Looking in the i586 directory shows version 4.0.69, but for some reason my system does not upgrade?

I'm using smart.

Best Regards

Phil
