· Gayal <[gayal.rupasinghe@xxxxxxxx](mailto:gayal.rupasinghe@xxxxxxxx)>:

i wanted to chk out the first version.  
so this is the file list i got.  
is there any way that i can download one file and uncompress.

Yes. Most often, these days, files are downloaded with the webbrowser. To uncompress, you need to run the appropriate decompressor, ie. bunzip2 or gunzip.

I think, I don't understand your question.

are these  
patch files also include in the kernel.??

Judging from the dates of the files – no.

Alexander Skwar
