Hi all,
just acquired a Lenovo 3000 N200 very cheap, shop had lost
box software
etc, all I got was laptop and charger.
Am trying to install Ubuntu 7.04, and gets to message

Have tried to install Win XP, and loads till a message no
hard drive
installed...

If your system doesn't work with Knoppix
then you generally have a real HW problem.

Hi,
managed to get Ubuntu 7.04 installed with gparted live CD, Deleted
partitions, and made an ext2.
I didn't get a Vista CD, now I have same problem, no CD recognized.

Re: Lenovo 3000 N200 problems

```
squareeyes@squareeyes-laptop:~$ cd /media/  
squareeyes@squareeyes-laptop:/media$ ls  
cdrom cdrom0  
squareeyes@squareeyes-laptop:/media$ cd cdrom0  
squareeyes@squareeyes-laptop:/media/cdrom0$ ls  
squareeyes@squareeyes-laptop:/media/cdrom0$ cd /media/  
squareeyes@squareeyes-laptop:/media$ cd cdrom  
squareeyes@squareeyes-laptop:/media/cdrom$ ls  
squareeyes@squareeyes-laptop:/media/cdrom$
```

Both cdrom and cdrom0 showing, but contents of cdrom drive not showing, with a variety of Data, music, Video in drive. Seems strange, will recognize drive to install, then it disappears.

etc/fstab

```
# /etc/fstab: static file system information.
```

```
#
```

```
# <file system> <mount point> <type> <options> <dump> <pass>
```

```
proc /proc proc defaults 0 0
```

```
# /dev/sda1
```

```
UUID=df6fbe91-1836-4676-ba11-8380956c2f37 / ext3
```

```
defaults,errors=remount-ro 0 1
```

```
# /dev/sda5
```

```
UUID=ccf5409b-dc4c-496c-ac0e-ed6bff7c7e5a none swap sw 0 0
```

```
/dev/hda /media/cdrom0 udf,iso9660 user,noauto 0 0
```

```
/dev/hdb /media/cdrom1 udf,iso9660 user,noauto 0 0
```

```
/dev/fd0 /media/floppy0 auto rw,user,noauto 0 0
```

Any ideas most appreciated, maybe it wasn't as good a deal as I thought:-) (\$A490)

Take Care

Winton

Let's take this one step at a time. Put a Ubuntu CD in the CD reader and turn on the laptop.

1. Does the CD put up a good live image and work well if slow?
2. If 1.is yes the goto Applications – Terminal and open it. In the terminal type:

```
sudo fdisk /dev/hda
```

Put what you see here.

3. If sudo fdisk displays an error then your hard drive is not present. But the good live CD proves the laptop has good ram.
