Hi all,  
When I press ctrl-Alt-F1 to bring up the first text console all sound that is currently playing in Gnome are stopped. If I press alt-F7 to go back to Gnome it starts playing again. Also if I start an audio player in a console such as mplayer there is no sound. However, it works if doing it through a gnome-terminal. Any tips on how this can be fixed?  
Many thanks,  
Christian

It's working as designed. A tty console is just that, a tty console. Think of it this way; you are playing Windows Media Player in Windows XP, you then switch to a DOS prompt – sound stops. You start Windows XP again – sound starts.

Well that was a dumb reply & my apologies – I should have tried it first.

If I bring up realplayer and then switch to tty1 ctrl-alt-f1 the music continues to play. I believe there is an option in mplayer to stop the

Re: [correction] Re: No sound in consoles

sound if you switch screens.

I just took the mplayer as an example. If you try to play an audio file in the movie player the same result happens.

The Realplayer you are refering to, is it Helix player?

Many thanks,

Christian
