Unable to open 'cdda://scd0/Track%201.wav' is the error I get when I try to play a CD I made on this very computer. I can not get any program to play,

VLC plays the audio disc I just made from brasero (original flac sources also decompressed automatically). I have always had issues with mplayer and vlc when trying the cdda: method for playing. But if i run vlc, select Audio CD and tell it to play it that way, it works.

I have experimented with the manual page on mplayer and I can't manage to get the device to open if I use the cdda: option. For instance:

```
dfox@newbox:~$ mplayer cdda://1/dev/scd0
MPlayer 1.0rc2-4.2.3 (C) 2000-2007 MPlayer Team
CPU: AMD Athlon(tm) 64 X2 Dual Core Processor 5200+ (Family: 15,
Model: 107, Stepping: 2)
CPUflags: MMX: 1 MMX2: 1 3DNow: 1 3DNow2: 1 SSE: 1 SSE2: 1
Compiled with runtime CPU detection.
mplayer: could not connect to socket
mplayer: No such file or directory
Failed to open LIRC support. You will not be able to use your remote control.
```

```
Playing cdda://1/dev/scd0.
Can't open CDDA device.
Failed to open cdda://1/dev/scd0.
```

Oddly enough, 'man vlc' doesn't even mention cdda methods.
