Hi NG,

i have suse 9.0 installed on a athlon 2000+ machine with a soundblaster 5.1 player and a hauppauge wintv fm pci.

i had some difficulties installing bttv and getting sound. it's working now.

the problem is though i can't get "line in" to the digital output.

wave and everthing else is playing over digital and analog at the same time, just "line in" is playing only over analog.

any ideas?

thanks,

stefan
