i have up graded the card with the yast program but installing the file from invidia 1.0B5336 package is still a problem for me. i do every thing in the instructions and i keep getting messages that the file is not found or no such file or dirctory I am realy getting frustrated with linux thats for sure. maybe someone could help me by walking me through the install like the baby that i am with this program

alt.os.linux.suse: Re: sax2

i would be greatly appreciative.
thanks in advance
