There should be 5 CDs and 2 DVDs. What you bought was a copy of someone else's SUSE and that is *\*not\** registerable. If you buy an actual, SUSE green box, commercial set you would have the sticker with serial number for registering. Don't worry about it. You just don't have the books or the installation support. If you want them, you will have to buy an official boxed set next time . . . :-)
