Hello,

After many frustrating hours of fiddling I've managed to install all packages needed for MythTV (ver mythtv-frontend-0.18.2-13SVN20051013.i586) (at least I think so). I've managed to set up IVTV and I'm now able to watch tv in MPlayer with sound. I've followed the instructions from <http://blog.eleith.com/eblog/?uid1=464&eblog1=1#5.3>. However, when I get to "mysqladmin -u mythtv -password mythtv" this command does not work. I've used "mysql_setpermission" to change the password for user mythtv to mythtv. However, I'm not sure this is working as I want to. Anyways, every time I start "mythtv-setup" I get an error that "myth could not connect to the database" (after the mythtv window has opened).

I'm sure my problem lies in mysql and how to successfully set up the needed account for mythtv. I've got the "qt3-mysql.3.3.5-19" installed.

Any suggestions (step by step, would be preferred) how to solve this problem would be much appreciated.

My system is

AMD 3500+ 64 BIT

Open Suse 10.0 (x86_64)

PVR-150

I've pasted the output from trying to run "mythtv-setup" below.

Thanks
