Houghi,
Why did you upgrade from 9 to 10?

I went from 9.1 to 10.0 because of curiosity. So for me 9.1 was broke in a non-technical way. There was no technical reason at that moment to do so. Also I wanted to re-arrange my partitions and doing that at the same time was the best option.

I might do the same in january when 10.2 is good an well out. Or I might hang in till 10.3. Not sure yet.

Theologians can persuade themselves of anything. Anyone who can worship a trinity and insists that his religion is a monotheism can believe anything — just give him time to rationalize it.
