I just hope you're taking good notes. Seems like every time progress is made with the trademark logos, something comes up in the text that mentions SUSE. Makes one appreciate the work they did on creating CentOS from RHEL.

https://en.opensuse.org/Making_a_SUSE_based_distribution

Are you doing this all with scripts, other than the actual artwork? If so, will you make the scripts available on opensuse.org, or opensuse-community.org? I'd be interested in seeing your total approach, and I'm sure others would also.

opensuse-community.org? What is that? I also do not see anything there that could not be on openSUSE itself. To me it looks like Yet another Wiki Page. If they would focuss on things that are NOT allowed on openSUSE.org, lice codecs and such, then I would agree and happily work with them.

Now I see that people writing for opensuse-community.org won't spend that time writing for openSUSE.org itself. The fact that they completely disrespect trademarks does not help either.

The scripts are already public. Look at the "Short version" of the second URL?

- * Download the ISOs you desire
- * If you need extra RPM's, download them
- * Run makeSUSEdvd -i [any other parameter]
- * Run rembrand -b "#FF00FF" -R /tmp/pink_rpms *.rpm
- * Edit, remove and change anything you desire
- * Run makeSUSEdvd -C

Re: Licenses for 10.2?

Fun part: rembrand can't keep its Changelog up to date, because David is working overtime on this. :-D

Obviously you could put the above into a script. Things you will need to make it 'complete'

- 1) Someone who can make alternative images.
- 2) Do some serious additional changes, so there will be a need to download. e.g. include MPlayer and such. That can be easily done by just adding Guru and Packman as repo's. To do that in a nice way, the keys should be included, so you do not get a warning when downloading.

houghi

This is excellent. Somewhere I got the idea that David was doing this as an after rembrand thing, rather than as bug fixes to rembrand. Obviously I missed some part of the discussions. Silly me. ;P

Thanks for setting me straight.
