Create a fat32 logical disk with doze tools, add a vfat fs type line
in /etc/fstab.

Required reading:

man mkdir

man mount

man umount

man fstab

create your vfat mount point mkdir /mnt/win_e

You have to solve for X

Modify /etc/fstab with something like

```
/dev/hdaX /mnt/win_e vfat iocharset=iso8859-1,codepage=850,umask=0 0 0
```

mount /mnt/win_e to see if it works.

Today's Tip of the Day, very large
