Now that you have spyware blocker, spam blocker, virus blocker, phishing blocker, and trojan blocker you need blocker blocker. Too many blockers? Yes, get Blocker Blocker. Blocks all those annoying blockers. Coming soon: Windows Blocker.

Isn't windows blocking itself already? Such annoying inconveniencies introduced by recent security "fixes" or wuergarounds ... Still wondering what did reset all IEs proxy settings from a *pac file to just default, since recent security updates for w2k. Damned, they are all on the phone. Hundreds. Screaming "Give us back our internet!!!". And they don't even know the (dns) names of their pcs, taped with HUGE letters on them. Oh no, not tackered on \$USERS foreheads (yet). Lord, send me a sweat dream tonight.
