Hello!

I'd like to announce my new website concerning linux software for chemistry. The site has been updated with the fresh URLs.

Linux4Chemistry:

<http://zeus.polsl.gliwice.pl/~nikodem/linux4chemistry.html>

The goal of this website is to provide with the most up-to-date links to the chemical software running on linux. Because the field is still under intensive development, the website will also be continuously under construction and you may even find some not-up-to-date URLs there for this same reason. In that case contact me, please.

I hope it will be helpful to you. You are very welcome to send me your comments, new URLs and so on.

You are very welcome to visit my Linux4Chemistry website!

Best regards,

Nikodem Kuznik
