Hi Group,

Has anyone of you already installed the Netgear WLAN PCI Card WG311. I think its based on an Intersil Prism GT Chip and already found some links like about that:

<http://www.seattlewireless.net/index.cgi/HardwareComparison>

<http://ruslug.rutgers.edu/~mcgrof/802.11g>

But the most time the drivers are for PCMCIA Cards and I didn't find any special drivers for the WG311 Card.

Max
