For IDE-SCSI emulation, you need:

SCSI-support, SCSI-generic support, SCSI-CD-ROM support

Then you need to add an append a line to your LILO config:

On older kernels (<= 2.4.18): append="hdc = ide-scsi hdd = ide-scsi"

On newer kernels (>= 2.4.20): append="hdc=scsi hdd=scsi"

My suggestion – install a newer kernel on your machine, and you'll probably have much better luck. 2.4.16 is rather outdated now...

Then running a bus scan with XCD-ROAST will generally pick up the drives as SCSI.

There is also a howto on my website below (linux section, debian Newbies guide)
