Linux renders ships.

This is indeed a new distro I've not heard about. Where Might I find a "renders LIVE"? :-)

Heh. I've been meaning to remove that from my .sig file. Never quite understood it myself.

I think it's from the fact Linux was used to do the CGI in /Titanic/, as opposed to doing CGI /with/ Itanics, whereas NT-equipped Navy ships didn't have a very good time trying to dodge BSODs on the high seas.
