USB would let me do something more interesting, but otherwise I'm probably limited to Samba file sharing from a Windows machine over 10 Mbps wired Ethernet. Thanks!

I'm not aware of any 16-bit PCMCIA USB adapters; certainly none that work with Linux.

One Compact Flash USB 1.1 Host Adaptor card:

<http://www.ratocsystems.com/english/products/subpages/cfu1u.html>

Oh, and look! It's a SL811HS that has a Linux driver. The only problem is that you may have to buy a powered USB hub.
