You'll love it. And don't get me wrong, even the OldWorld-unfriendly CDs do the trick, you just need to download BootX from [penguinppc.org](http://penguinppc.org) (<http://penguinppc.org/projects/bootx/>) and follow some extra instructions: <http://forums.gentoo.org/viewtopic.php?p=1657215#1657215>

Everything else is covered in the Gentoo PPC handbook, located at <http://www.gentoo.org/doc/en/handbook/handbook-ppc.xml> (add ?full=1 to that URI if you want the entire handbook in a single HTML page).
