Watch out for the Netgear WG511, version 3 cards do not work and version 2 (Made in China) do not work.

FYI: the Netgear WG511 also is a prism chipset, the Netgear WG511T is atheros chipset

03:00.0 Network controller: Intersil Corporation Intersil ISL3890 [Prism GT/Prism Duette] (rev 01)

Subsystem: Netgear WG511 Wireless Adapter

Flags: bus master, medium devsel, latency 80, IRQ 17

Memory at 20800000 (32-bit, non-prefetchable) [size=8K]

Capabilities: <available only to root>
