Replace "on boot" with "when trying to boot".

It's the same hardware that both RH7.3 and RH9 works fine on.

Motherboard: Asus A7V133 rev 1.05.  
CPU: AMD Athlon XP 1600+  
RAM: 512MB  
NIC: 3Com 3C905C-TXM  
Audio: Creative SoundBlaster Live! 5.1  
CD-ROM Burner: LiteOn 52x24x52x  
DVD Drive: Pioneer DVD-116  
Display Adapter: Leadtek WinFast GeForce256 DDR 32MB AGP  
Monitor: ViewSonic P815-4  
Printer: HP LaserJet 5

Luckily, I installed FC2 on a spare HDD and didn't clobber RH9 with FC2.
